These Interim Condensed Consolidated Financial Statements have been prepared in accordance with IAS 34 Interim Financial Reporting ("IAS 34") as issued by the International Accounting Standards Board ("IASB") and using the accounting policies as outlined in the Company's annual Consolidated Financial Statements for the year ended April 30, 2016.

On December 7, 2016, the Board of Directors authorized the financial statements for issue.

Basis of consolidation

Intra-group transactions, balances, income and expenses are eliminated on consolidation, where appropriate.

Basis of preparation
These Interim Condensed Consolidated Financial Statements have been prepared based on the historical cost basis except for certain financial instruments that are measured at fair value, using the same accounting policies and methods of computation as presented in the Company's annual Consolidated Financial Statements for the year ended April 30, 2016.

IFRS 11 *(amended) Joint Arrangements - Accounting for Acquisitions of Interests in Joint Operations*
IAS 1 *(amended) Presentation of Financial Statements*

***Effective for annual periods beginning on or after January 1, 2019, with earlier application permitted.*
****Effective for annual periods beginning on or after January 1, 2017, with earlier application permitted.*

The adoption of the above standards is not expected to have a significant impact on the Company's Consolidated Financial Statements.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY AND CRITICAL ACCOUNTING JUDGMENTS

The preparation of financial statements, in conformity with International Financial Reporting Standards ("IFRS"), requires management to make judgments, estimates and assumptions that are not readily apparent from other sources, which affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods. Significant areas requiring the use of management estimates relate to the useful lives of property, plant and equipment for depreciation purposes, property, plant and equipment and inventory valuation, determination of income and other taxes, assumptions used in the compilation of share-based payments, fair value of assets acquired and liabilities assumed in business acquisitions, amounts recorded as accrued liabilities, contingent consideration and allowance for doubtful accounts, and impairment testing of goodwill and intangible assets.

(in thousands of Canadian dollars, except per share information)

4. KEY SOURCES OF ESTIMATION UNCERTAINTY AND CRITICAL ACCOUNTING JUDGMENTS (Continued)

The Company applied judgment in determining the functional currency of the Company and its subsidiaries, the determination of cash-generating units ("CGUs"), the degree of componentization of property, plant and equipment, and the recognition of provisions and accrued liabilities.

5. SEASONALITY OF OPERATIONS

The third quarter (November to January) is normally the Company's weakest quarter due to the shutdown of mining and exploration activities, often for extended periods over the holiday season.

7. INCOME TAXES (Continued)

The Company periodically assesses its liabilities and contingencies for all tax years open to audit based upon the latest information available. For those matters where it is probable that an adjustment will be made, the Company records its best estimate of these tax liabilities, including related interest charges. Inherent uncertainties exist in estimates of tax contingencies due to changes in tax laws. While management believes they have adequately provided for the probable outcome of these matters, future results may include favorable or unfavorable adjustments to these estimated tax liabilities in the period the assessments are made, or resolved, or when the statutes of limitations lapse.

10. BUSINESS ACQUISITION

During the current quarter, the Company made the second payment on the contingent consideration arising out of the Taurus Drilling Services acquisition, for $3,881 (2015 - $1,783).

11. RESTRUCTURING CHARGE

During the previous year, due to ongoing market difficulties in the Republic of South Africa and Namibia, the Company decided to close its operations in those countries.

These restructuring initiatives generated impairment losses calculated based on the determination of the fair value of assets less cost of disposal. Fair value was determined through the use of industry knowledge and specialists.

The costs related to these initiatives were recorded as part of the restructuring charge for a total of $59 and $6,491 for the three and six months ended October 31, 2015, respectively. For the three months ended October 31, 2015, the amount consists of employee severance charges of $59. For the six months ended October 31, 2015, the amount includes an impairment charge of $3,479 relating to property, plant and equipment; a write-down of $1,304 to reduce inventory to net realizable value; employee severance charges of $446 and other non-cash charges of $262 along with a charge of $1,000 relating to the cost of winding down operations.

12. FINANCIAL INSTRUMENTS

Fair value

The carrying values of cash, trade and other receivables, demand credit facility and trade and other payables approximate their fair value due to the relatively short period to maturity of the instruments. The carrying value of long-term debt approximates its fair value as most debts carry variable interest rates, and the remaining fixed rate debts have been acquired recently and their carrying value continues to reflect fair value. The fair value of the interest rate swap included in long-term debt is measured using quoted interest rates. Contingent consideration is recorded at fair value and is classified as level 2 in accordance with the fair value hierarchy.

- Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 - inputs other than quoted prices included in Level 1 that are observable for the assets or liabilities, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 - inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

There were no transfers of amounts between Level 1, Level 2 and Level 3 financial instruments for the quarter ended October 31, 2016. Additionally, there are no financial instruments classified as Level 3.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

Credit risk

As at October 31, 2016, 84.6% (April 30, 2016 - 85.9%) of the Company’s trade receivables were aged as current and 1.7% (April 30, 2016 - 7.2%) of the trade receivables were impaired.

The movements in the allowance for impairment of trade receivables during the six month periods were as follows:

	October 31, 2016	October 31, 2015
Opening balance	**$ 3,554**	$ 4,204
Increase in impairment allowance	**642**	801
